Product Directory Page

Product Directory Page			
Position	Description	Size(pixels)	Quotation (/ month)
eB3	Top banner	468x60	RMB1,000
eB4	Right banner	250x200	RMB1,500

The screenshot shows the BIO-EQUIP website's product directory. The page is organized into a grid of product categories. Two yellow callout boxes highlight specific banner positions:

- eB3 top banner**: 468×60 pixels, RMB 1000/month. This points to the top banner area of the product grid.
- eB4 right banner**: 250×200 pixels, RMB 1500/month. This points to the right banner area of the product grid.

The website header includes the BIO-EQUIP logo, navigation links (Home, Suppliers, Products, News, Events and Expos, About Us), a search bar, and a featured advertisement for INTEGRA pipettes.

The main content area is a grid of product categories, including:

- Centrifuges**: High-speed Refrigerated Centrifuges, Large-capacity Centrifuges, Benchtop Centrifuges, Miscellaneous.
- Incubators/Drying ovens**: CO2 Incubators, Plant Incubators, Biochemical Incubators, Hybridization Ovens, Constant Temperature and Humidity Ovens, Vacuum Oven/Drying Ovens, Miscellaneous.
- Microscopes**: Biomicroscopes, Inverted Microscopes, Stereomicroscopes, Electron Microscopes/STM/AFM, Micro-imaging System, Micromanipulators, Confocal, Microscope Accessories&others.
- Electrophoresis**: Power Supplies, Electrophoresis Cell, Gel Imaging System/UV Light Box.
- Microplate Readers**: Microplate Readers/Plates Washers, Microbiological Analysis, Miscellaneous.
- PCR**: PCR Amplifiers, Real-Time PCR.
- Spectrum/HPLC/GC/MS**: Spectrophotometer, Ultraviolet Detectors, HPLC/FPLC, Gas Chromatograph, Mass Spectrometer, Gas Generator Freezer.
- Physical&Chemical Analysis**: PH Meters/Conductance, Miscellaneous.
- Cryostats/Freezer**: Low Temperature, Liquid Nitrogen Co, Freeze Dryer, Ice Makers, Baths & Circulators, Dry Baths, Miscellaneous.
- Synthesizers/Sequencers/Cell Analysis**: DNA / Organic / Polypeptide, Synthesizers, Genomics/Sequencers, Cell Analysis, Proteomics.
- Water/Ultrafilters/Concentration**: Lab Water, Ultrafilters, Concentration/Rotary Evaporators.
- Fermentors/Bioreactors**: Fermentors, Bioreactors.
- Balances**: Analytical/Precision Balances, Miscellaneous.
- Plant Physiology/ Ecology**: Plant Physiology, Agronomy / Ecology.
- Clean Benches/Biosafety/Sterilizers**: Clean Benches, Biosafety Cabinets, Fume Hood, Autoclaves/Sterilizers.
- Gene transfer**: Gene transfer.
- Physiology/Pharmacological/ Neurobiology**: Electrophysiology, Patch Clamps, Animal Experimental Equipment, Animal Cages.
- Pumps**: Peristaltic Pump, Vacuum Pump.
- Spotter/Scanning Apparatus**: biology Software.
- Sample processing**: Pipettors, Stirrers/Mixers, Homogenizers/Milling, Shakers/ Oscillators, Miscellaneous.
- Consumables/Lab Wares**: Cell/Tissue Culture, Filtration/chromatography/Hybridization, Tubes, Pipet tips, Miscellaneous.
- Reagents**: Molecular Biology, Biochemistry, Cell Biology, ELISA/Diagnostic Kits, Antibody Kits, Serum/Medium, Miscellaneous.
- Laboratory Animals/Cell lines**: Laboratory Animals, Cell lines/Bacterial Strains.
- Lab furniture**: Laboratory Tables.
- Bio Service**: Bio Service.
- Others**: Drug tests/Pharmaceutics, Environmental Monitors, Radioactivity/Luminescence, Food & Beverage, Miscellaneous.

On the right side, there are featured advertisements for Thermo Scientific Revco UxF Series -86°C Freezers and LEAD/Tech Artificial Climate Incubator, along with a 'Related news' section.

TTP Labtech Delivers Hit-Picking

Clicks: 3

mosquito® X1 (nanolitre pipettor) provided

Cambridge, UK (19th March 2012) – An exciting technological collaboration integrating TTP Labtech's mosquito® X1 automated nanolitre pipettor with a well-known microplate mover has been set up, bringing an innovative hit-picking solution to the University of Michigan. This fully automated system is being utilised by the University's High Throughput Screening (HTS) Core, Centre for Chemical Genomics, to automate the selection and processing of compound hits from screens, using their 150,000 strong library.

The mosquito X1 and microplate mover automated platform is fully controlled by the mosquito CherryPicker software. The unique design of the mosquito nanolitre pipettes allows for multiple aliquots of compound from each pipette, rapidly preparing serial dilution and dose response plates for secondary screens.

mosquito® X1 automated nanolitre pipettor

"The mosquito X1 instrument has proven revolutionary in increasing the throughput of our hit selection service" said Martha Larsen, Director of HTS, University of Michigan. She continued, "it is particularly important to us that the mosquito X1 can cherry-pick the compounds from the storage plates, and that the instrument can perform dose response dilutions for use in our secondary screening stage. Before we purchased the mosquito we prepared dose response 384-well plates by hand and had to limit screens to 200 compounds a time. With the mosquito X1 we have been able to significantly increase our screening rate and throughput."

In addition, the ability of the mosquito X1 to dry spot compounds from the source plates overcomes the commonly encountered issues caused by aliquoting labile molecules in aqueous solutions in advance of the screening experiment. This is particularly beneficial when setting up biological assays which require lengthy set up times, such as the time dependant transient transfections often used by this HTS facility.

Joby Jenkins, Product Manager, TTP Labtech commented: "The mosquito X1 instrument provides the speed and efficiency required for HTS facilities. We have worked closely with the HTS Core to provide a platform that is optimised to meet their specific needs. The ability to transfer compounds within a complex, high density microplate format, while avoiding cross-contamination, can boost the throughput of any screening service. Coupling the mosquito X1 instrument with a microplate mover creates a platform that provides a level of walk-away confidence and greater workflow efficiency. We are delighted that this system has had such a positive effect on their workflow practices."

For more information about the mosquito® X1 from TTP Labtech please visit: www.ttplabtech.com/mosquito.

About TTP Labtech Limited
Based near Cambridge, UK, TTP Labtech creates, designs and manufactures robust, reliable and easy-to-use instrumentation, offering life scientists better tools and techniques, simplifying complex operations and saving time and material costs.

We provide state-of-the-art solutions developed for specific product areas including: cell-based screening (acumen®, mirrorball®); sample management (comPOUND®); low volume liquid handling (mosquito®) and the management of analytical automation (lab2lab).

TTP Labtech is owned by its employees, and our continued drive to innovate combines cutting edge science with first rate engineering, manufacturing and outstanding customer support.

About Us

BIO-EQUIP was built in July 1998 as a free online information portal for lab equipments and supplies. Now it is a leading provider of free News, Events & Expos, Product Directory, New Products, Technical Articles, Application Notes, Biotechnology Services and Jobs.

Serving customers through two websites, **www.bio-equip.com** and **www.bio-equip.cn**, BIO-EQUIP offers customers a complete product directory which involves more than 100 products ranges among laboratory equipments, reagents, lab wares, lab animals, Bio Services, Bio Softwares and Books.

Bio-equip.com serves Chinese customers from research communities, universities, hospitals and clinical diagnostic labs, pharmaceutical factory, inspection and quarantine bureau, CDC, as well as environmental control and industrial processing.

Bio-equip.cn established in 2006 is the best access to China's suppliers of laboratory equipments, reagents and laboratory wares. More than 400 Chinese and foreign enterprises have become bio-equip's register members. Visitors from 110 countries established relationship with our register members through bio-equip.cn according to the latest report in Dec. 2011.

Thanks for your attention!
